Education

Cukurova University: Computer Engineering **Degree**: Bachelor of Engineering **Sept 2018 – Sept 2022**

Work Experience

Data Science Intern **Jul 2023 – Dec 2023**
Doğuş Teknoloji *Istanbul, Turkey*

- Built many generative AI applications using **OpenAI**, **Azure**, **Streamlit**, **LLamaIndex** and **Langchain**.
- **Reduced the cost** of token processing by **40%** by **removing unnecessary tokens** before processing.

Machine Learning Intern **Mar 2023 – May 2023**
Technology Development Group *Sakarya, Turkey*

- Improved current line detection algorithm using **OpenCV** and **Python**.
- Trained object detection models using **YOLOv7** and **increased accuracy** to **87%** from 85%.

Data Science Intern **June 2022 – Aug 2022**
Jotform *Ankara, Turkey*

- Analyzed data recorded from users using **Jupyter**, **Pandas**, **Matplotlib**, **FacebookProphet**.
- Performed statistical approaches using **Statsmodels** and **Scipy** on time-series data.

ML Engineer / Data Scientist **Sep 2021 – June 2022**
NutzenTech *Istanbul, Turkey*

- Built Object Detection models using both **PyTorch** and **TensorFlow** to be used in drones.
- Built Machine Learning pipeline for object detection using **AWS SageMaker**, **S3 Bucket** and **Lambda**.
- Detection accuracy of objects are **increased** to **92%** from 82%

Machine Learning Intern **Dec 2020 – Apr 2021**
Apziva *Ankara, Turkey*

- Analyzed customer data using **Pandas**, **Matplotlib**, **Seaborn** and presented in a report format.
- Built classification models using **Scikit-Learn**, candidate-tracking cost reduced by 20%.

Machine Learning Engineer **Sept 2020 – Apr 2021**
Cukurova Hydromobile Team, Cukurova University *Adana, Turkey*

- Trained Object Detection models using **YOLOv4** and **TensorFlow Object Detection API**.
- Prepared a dataset manually that consists of over 1200 traffic signs and traffic lights images. With the new dataset, the model has been re-trained and the accuracy **increased** to over **90%** from 70%.

Machine Learning Intern **May 2020 – Sep 2020**
CENGA R&D Team, Cukurova University *Adana, Turkey*

- Built a Deep Learning interface that trains various models using **TensorFlow**, **PyTorch** and **Tkinter**.

Technical Skills

- Languages: C/C++, Python, Java, SQL
- Libraries: TF, Keras, PyTorch, PySpark, Sklearn, Plotly, Matplotlib, Numpy, Pandas, Seaborn, OpenCV
- Tools: Jupyter, Git, Linux, CI/CD, Docker, Kubernetes, AWS, Azure, MySQL, PostgreSQL

Projects

Forecasting Bus Demand: Training Deep Learning models and applying statistical approaches.

- Written in **Python**. Used **Scikit-Learn**, **Numpy**, **Pandas**, **Seaborn**, **Matplotlib, Tensorflow.**

Ames House Prices: EDA, Feature Engineering and training an XGB estimator for house prices.

- Written in **Python**. Used **Scikit-Learn**, **Numpy**, **Pandas**, **Seaborn**, **Matplotlib**.

U.S. Wildfire Analysis: Applying EDA, building and tuning an estimator to predict wildfire cause.

- Written in **Python**. Used **Scikit-Learn**, **Numpy**, **Pandas**, **Matplotlib**, **SQL**.

WGAN-GP Trainer: Customizable Wasserstein Generative Adversarial Networks.

- Written with **Python**. Built networks using **Pytorch**. Records logs with **Tensorboard**.
